

Welcome to ROSA Desktop!

In the ROSA Desktop you can use function «stack folder», which allows to have an access to the frequently used files and folders without need to open file manager.

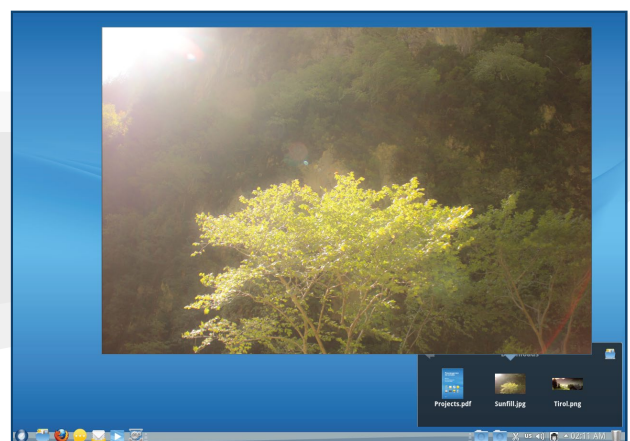

It is really easy to use stack folder. Just drag necessary folder from file manager to the right side of RocketBar and in pop-up window choose «StackFolder». After you have created stack folder, it will be connected with main folder and will display all content of this folder. To open file in stack folder, click on it one time. If you want to take a look on file in the stack folder, just aim on it with cursor and press «space». KLook will be opened and it will show you your file.

ROSA Desktop has two pre-installed stack folders: «Documents» and «Downloads». You opened this file from folder «Downloads». All files that have been downloaded from Internet are saved into this stack folder. Files that have been downloaded with Firefox, Chromium or Thunderbird are saved into this folder too. When new file appears in folder «Downloads», stack folder informs you with «jumping up» and puts this file in the upper part of the grid. You can easily find new file.

To open folder which is connected with stack folder, just click on the folder icon in the upper right corner.

To move out file from stack folder, just open it and drag file into another place. For example, if you want to delete file, drag it into the Trash.

To add file into stack folder, just drag necessary file from desktop, file manager or area of «Last Documents» in SimpleWelcome on stack folder and wait until it will be highlighted. Release the mouse button and choose right action in appeared window.

If you want to delete stack folder — just click on it with right mouse button and choose «Delete». Don't worry: your real folder won't be deleted.
